COLOR FLOW & DOPPLER STUDY

Patient:				**File #:**			**Date:**	
Mitral Valve			**Normal Range (M / F)**	**Aortic Valve**				
Peak velocity (cm/sec)	E	A			***BEFORE***		***AFTER***	
Peak Gradient(mmHg)	E	A		Peak velocity		cm/s		cm/s
IVRT			60-90 sec	Pressure Gradient		mmHg		mmHg
Regurgitant Fraction			<30 %	Area by Continuity Equation			>1.5 cm^2	
MV DecTime			162 - 230 msec	Regurgitant Fraction			<30 %	
E/A ratio				AR PHT			>500 msec	
Area by PHT			>2.0 cm^2	AV Mean Gradient			<20 mmHg	
Mean pressure gradient			<5mmHg	AR jet density	☐	Faint	☐	Dense
Tissue Doppler (cm/s)				**Pulmonic Value**				
Septal	e^1	a^1	E/e'	Acceleration time			msec	
Lateral	e^1	a'	E/e'	Pressure Gradient			mmHg	
				Regurgitation			%	
Tricuspid valve				Systolic PAP by acceleration time			>25 mmHg	
E wave velocity			cm/s 0.64					
A wave velocity			cm/s 1.65	PR jet density	☐	Faint	☐	Dense
Regurgitant Fraction			%	RVOT VTI			cm	
Peak TR jet velocity			cm/s					
Systolic PAP by TR jet			> 25 mmHg	**Qp/Qs =**		Normal: 1.0 Lt to Rt: > 1.0 Rt to Lt: < 1.0		

CONCLUSION :

Mitral Valve			Interventricular Septum		
ED Velocity		mm^2	Diastolic diameter		mm
DE Excursion		mm	Systolic diameter		mm
EPSS		mm	Excursion		mm
Area by planimetry		cm^2			
Tricuspid Value:			LV Posterior Wall		
			Dlastolic diameter		mm
Aortic Valve			Systolic diameter		mm
Root Diameter		mm	Excursion		mm
Valve Opening		mm			
Excursion		mm	Left Ventricle		
			Dlastolic diameter		mm
Right Atrium			Systolic diameter		mm
RL Diameter		mm	LVEDV		mL
			LVESV		mL
Pulmonic Valve			LV mass index		gm/m^2
Root Diameter		mm	Relative wall thickness		mm
Systolic Notching			Ejection Fraction		%
			Fractional Shortening		%
Left Atrium			Heart Rate		bpm
AP		mm	Simpson's		%
RL Diameter		mm	Tapse		cm
LAVI		$/mL\ m^2$	Pericardial Space		
			Anterior Effusion		mm
Right Ventricle			Posterior Effusion		mm
AP Diameter		mm	RVOT		mm
RL Diameter		mm	LVOT		mm
